Our range of universal CV boots CHEAP (for passenger cars) and MEGA CHEAP (for commercial vehicles and 4WD cars) covers most of applications (approx 98%).

It allows a fast and perfect assembly on all models.

Manufactured in stretch neoprene with an elasticity of more than 800% assembly is possible both with the cone or for a quick, clean and easy assembly with the innovative tool "Clickgun".

It is sufficient to plug the tool to air pressure, place the boot over the slider, press the "ON" button, place the boot over the joint and....the JOB is DONE !!

They are suitable on joints with a maximum diameter of mm . 117 (D6102) and mm . 146 (D6103) .

Supplied in customized kits
