

Don't Worry

Be flexi

Falga is pleased to present its range of high elasticity C.V. Boots FLEXI, with which you can cover most of the vehicle car park.

- Fast assembly
- Reduction of references to keep in stock
- Perfect adaptability to the joint (like the original ones)
- It is not necessary to cut the boot accordingly to the diameter of the joint
- They are produced in high elasticity neoprene of high quality and high resistance to ozone, stress and low temperatures
- The boots can be mounted through the use of a plastic cone or of the modern Clickgun, thus reducing time for replacement

All kits include: 1 boot, 2 universal clamps with holes and 50 gr grease and are packed in a Falga, neutral or customized box.
